

Skill Workshop on Genome Sequencing and Analysis

Jointly organized by

Department of Microbiology, Kasturba Medical College, Manipal;
School of Life Sciences, Manipal and University of Sydney

May 9th -10th, 2018

Genome sequencing is the powerful current tool that has revolutionized the pathogen diagnosis, genotyping, detection of virulence, and detection of resistance to antibiotics. It has opened the paths for in-depth research in the scientific field.

Workshop Content:

This workshop will provide the participants detailed practical knowledge of applications of genome sequencing in infectious diseases and will provide the opportunity to have one to one discussion with eminent experts in this field.

Who can participate:

- ❖ PhD scholars, MSc students, young researchers and junior faculty members.
- ❖ Number of participants is limited to 20.
- ❖ Requests for participation should be sent prior to registration.

Registration Fees for Workshop

INR 2500 which includes course material, refreshments and lunch.

Registration:

Last date for registration is April 20th, 2018

Venue:

Workshop (9-10th May, 2018)

School of Life Sciences,
MAHE, Manipal

Seminar (11th May, 2018)

Genomics and Tuberculosis

Interact Hall, KMC,
MAHE, Manipal

No. of Participants: 100
No Registration fees

Conveners:

School of Life Sciences & Department of Microbiology, KMC, Manipal
Manipal Academy of Higher Education, Manipal – 576104
